

Kyle McKee

Kyle has worked in education related positions formally since 2007. He began his career as a degreed professional in 2010 as a public school mathematics teacher for high school. He then eventually taught both public and private school, and all grades 3 through 12 as well as post-secondary ranging from subject areas of math and science, to Writing and Literature, to Spanish, and even Physical Ed one semester. In 2017 he earned his Certified Aviation Ground Instructor Certifications and in 2018, and his Certified Flight Instructor Certificate, and started a new avenue of education – Flight Training.

Kyle feels the best part of any of these positions, is teaching the students. He loves to learn and to help others to learn, getting to know the student, their goals, and helping them to accomplish those goals. He believes there is no greater pleasure than to help a person achieve their goals of understanding a complicated or very technical subject. He enjoys making the daunting and difficult into understandable and accomplishable. To see the individual grow and develop to have confidence and ability is truly the reward.

Kyle's interests in any form of education has always been to make the learning meaningful. Creating instruction that relates to the student and can be readily comprehended and understood in a way that provides application and value to them personally. In aviation specifically, creating a safe, competent, and capable pilot, who possesses the skill and knowledge for this challenging and ever-changing world of aviation.
