CORE Experiences Pre-Survey

September 17, 2019 6:58 AM MDT

Q1 - Please think about how well the statements below describe you. Use the 10 point

scale to indicate how much you disagree (lower numbers) or agree (higher numbers) with

each of the statements. VALUING At this time, I have a strong ability to...

#	Field	Minimum	Maximum	Mean	Std Deviation	Variance	Count
1	...develop and analyze my own values.	1.00	10.00	7.90	2.03	4.11	291
2	...consider and understand values different than my own.	1.00	10.00	8.29	1.70	2.90	290
3	...respect for diversity and differences in my community.	1.00	10.00	9.10	1.47	2.17	290

#	Field	1 - Strongly Disagree	2	3	4	5	6	7	8
1	...develop and analyze my own values.	0.69% 2	0.69% 2	1.37% 4	4.47% 13	7.22% 21	8.25% 24	13.75% 40	18.90%
2	...consider and understand values different than my own.	0.34% 1	0.34% 1	0.69% 2	1.72% 5	4.83% 14	4.83% 14	15.17% 44	20.34%
3	...respect for diversity and differences in my community.	0.69% 2	0.00% 0	0.34% 1	0.34% 1	2.07% 6	2.76% 8	5.86% 17	11.72%

End of Report

Here is a summary of the items ranked in descending order by the average self-assessment score:

Item	Average (Mean)	% Selecting 8 or Above	% Selecting 5 or Below
...respect for diversity and differences in my community.	9.1	88%	3%
...understand ideas and opinions different than my own, even if I do not agree with them.	8.47	75%	6%
...consider and understand values different than my own.	8.29	72%	8%
...consider multiple viewpoints of an issue before accepting or formulating a conclusion.	8.04	68%	8%
...develop and analyze my own values.	7.9	64%	14%
...seek relevant facts and think creatively in order to resolve issues or solve problems.	7.77	60%	12%

Additional summary notes on the results:

- 10 was the modal response for every item except “seek relevant facts and think creatively in order to resolve issues or solve problems” – the modal response was 8 for that item.
- While the range of responses for all items included 1 – Strongly Disagree, no more than three respondents chose 1 for any item.
- Self-assessments across all items were strongly correlated, which we’d expect given the concentration of responses at the high end of the scale.
